EXECUTIVE SUMMARY

Computer Science undergraduate with hands-on experience in Machine Learning, NLP, and enterprise software development. Skilled in building data pipelines, deploying models, and working in Agile SDLC environments to deliver measurable business impact.

EDUCATION

Kalinga Institute of Industrial Technology

Bachelor of Technology in Computer Science and Engineering; CGPA: 7.87

Bhubaneswar, Odisha, India

Aug 2022 – May 2026

Delhi Public School

CBSE - Class 12th: 69.6%

Bhilai, Chhattisgarh, India

2021 – 2022

Delhi Public School

CBSE - Class 10th: 86.6%

Bhilai, Chhattisgarh, India

2019 – 2020

TECHNICAL SKILLS

Languages: Python, Java, SQL

Frameworks & Libraries: TensorFlow, Scikit-learn, PySpark, spaCy, NLTK, FastAPI, BeautifulSoup, Pandas, NumPy, Matplotlib, Seaborn, Plotly

Tools & Technologies: Jupyter, Tableau, Git, Google Sheets API, Google Drive API, Apache Tomcat, VS Code, HTML, CSS, JSP/Servlets, JDBC

Databases: MySQL, Oracle SQL

AI Platforms: Claude AI (Anthropic), OpenAI (GPT), Gemini Pro (Google DeepMind)

Proficiencies: Machine Learning, Deep Learning, NLP, GenAI Integration, Web Scraping, Workflow Automation, Email Automation, Data Cleaning, EDA, Model Deployment, REST APIs, Feature Engineering, ETL Pipelines, SDLC, Agile Methodologies

WORK EXPERIENCE

Software Developer Intern

May 2024 – June 2024

Bhilai Steel Plant

Bhilai, India

- Designed and deployed **web-based Material Gatepass MIS** using HTML, JSP/Servlets, Oracle SQL with JDBC on Apache Tomcat 9, streamlining workflows and boosting **operational efficiency by 45%**
- Developed optimized **Data Entry and Retrieval modules** with SQL query optimization and JDBC connection pooling, improving **transaction throughput by 30%** and reducing **response times by 40%**

PROJECTS

Asynchronous AI Automation Microservice | Python, Llama 3.3, FastAPI, Docker, WeasyPrint

[GitHub](#)

- Architected a **fully autonomous, asynchronous data enrichment pipeline** utilizing FastAPI and **Large Language Models (Llama 3.3)**, automating live web-scraping and unstructured data processing into strict **JSON schemas**
- Engineered and deployed a **containerized document generation microservice** via **Docker** and **WeasyPrint**, resolving cloud-level SMTP network restrictions to achieve **100% automated rendering and delivery** of dynamic HTML-to-PDF reports

End-to-End Healthcare AI | Python, BERT, FastAPI, NLP, Logistic Regression, NER

[GitHub](#)

- Engineered an **end-to-end AI healthcare platform** leveraging **BERT (NLP)** for disease prediction, **cosine similarity** for recommendation systems, and **Logistic Regression + NER** for ADR detection, improving clinical decision support with high model accuracy
- Designed and deployed a **scalable backend using FastAPI** and Python, integrating **multiple ML models into RESTful APIs** for real-time inference, optimizing latency and enabling seamless interaction between data pipelines and production systems

Amazon GenAI Sentiment Guardian | Python, spaCy, NLTK, Pandas, Tableau, NLP

[GitHub](#)

- Engineered end-to-end **GenAI sentiment analysis pipeline** processing **34,000+ Amazon reviews** achieving **87.11% accuracy** using advanced NLP techniques with spaCy and NLTK for text preprocessing, feature extraction, and sentiment classification
- Implemented **ethical AI bias detection framework** across **41 product categories** and delivered strategic recommendations projecting **12% NPS improvement** and **15Cr revenue protection** through data-driven quality interventions

CERTIFICATIONS

Machine Learning - Internshala | Data Analytics - Deloitte Australia | Data Science & ML - Udemy
